Why You Need to Define Your Organization's Collaboration Platform

HCN 29th Annual Board Conference, June 2023

The Art of the Possible with a Modern Collaboration Platform

The purpose of a collaboration platform is to bring your employees together in one virtual office space with critical governance guardrails in place.

Road Map of Fundamental Initiatives

There are four fundamental initiatives that every organization needs in order to create and maintain a modern and secure collaborative platform.

Each stop on this road map is critical to increasing communication and collaboration between staff and outside parties while organizing and storing your files safely and consistently across departments. Implementation of these initiatives will deliver an excellent user experience that increases productivity and the accuracy of your defined workflows.

Where are you in your digital transformation journey?

1 Optimizing SharePoint

Adopting a highly functional collaboration hub for everything that is easily independently maintained without technical knowledge, delivering exceptional user experience.

2 Migrating & Consolidating Data

Migrating data (P: & U: drives) into SharePoint securely & seamlessly without interrupting your business.

3 Enforcing Data Governance

Collaborate securely with confidence that your governance policies are being enforced.

4 Automating Business Processes

Automating & digitizing your forms & workflows, eliminating human error and excess paperwork.

Single Platform to Run All Your Apps

A dependable infrastructure makes it easy to modernize your current business healthcare applications, servers and storage, or scale to facilitate growth.

- ✓ **Simplify Operations.** Simplify ongoing operations by as much as 50% with consolidated views into apps & VMs, servers, and storage across your environments.
- ✓ **Enhance Productivity.** Deliver a reliable, consistent user experience so healthcare providers can focus on improving patient health.
- ✓ **Consolidate Workloads.** Occupy 80% less VM space versus traditional infrastructure with a single web-scale platform for all workloads including VDI, EHR, PACS, and VNA.
- ✓ **Gain Linear Scalability.** Start small and linearly scale performance and capacity one node at a time to meet demands. Reduce upfront costs and avoid over-provisioning.
- ✓ **Maintain Business Continuity.** Keep applications and critical data available with a self-healing platform, VM-centric data protection, and affordable business continuity.
- ✓ **Increase Security.** Enhance patient care with improved data access while maintaining industry-leading security protections.

Community Health of South Florida, Inc. (CHI) runs their pharmacy, radiology, and other critical applications on Nutanix.

"As a busy IT team, it is critical to us that the technology that we put in place does its job," said Jose Carmona of CHI. "With Nutanix, I don't have to worry about problems. The system works well and is easy for my team to utilize."

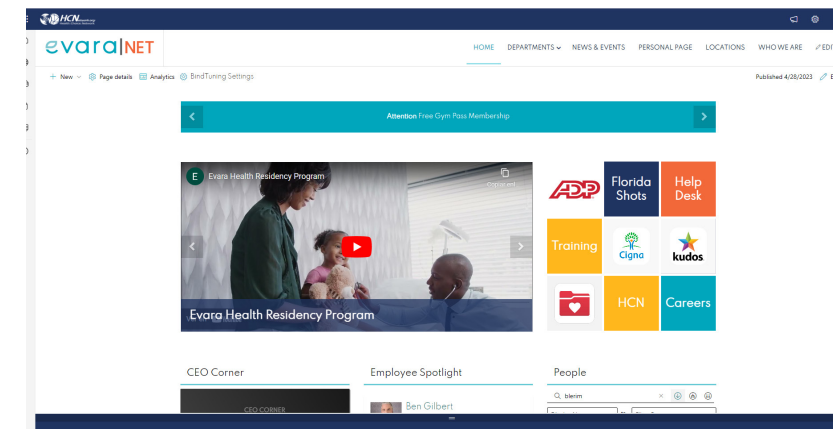

Read the case study on how Fortright & Nutanix helped CHI leverage technology to simplify the management of their IT infrastructure at www.success.forthright.com/case-study1

SharePoint Optimization

Level Up to a Modern Intranet

Accelerate the transition to virtual operations that empower and simplify information sharing between physicians, nurses, home care providers, and staff

We offer specialized SharePoint solutions tailored to the unique needs of the health industry. Leveraging expertise in health industry themes and web parts, we ensure that healthcare organizations have access to the specific tools and functionalities required to enhance their intranet experience.

Once set up, the intranet becomes a self-sustaining system. Department heads can independently maintain data, apps, and files specific to their departments, ensuring streamlined workflows.

A maintenance-free, comprehensive company-wide directory is accessible through the hub. This directory streamlines communication and collaboration, ensuring employees can easily connect with one another across the organization.

We enable efficient management of document workflows within the intranet hub. Whether it's employee manuals or HR requests, our solution simplifies document processes, enhances accessibility, and improves overall efficiency.

Optimize Your Intranet, Streamline Workflows, and Empower Your Employees

Central Hub for Employees

Drive employees to one location for all their applications, data, company directories, and files for their department

Go-To Spot for Information

Use your employee hub for dispersing company information & updates, managing forms, and accessing training resources

Easy to Maintain

Once your Intranet is set up, it is easy for department heads to maintain with no technical resources needed

Data Migration & Consolidation

MONITOR • TRACK • VALIDATE • SUPPORT

Once you have SharePoint set up and optimized for your organization, you'll need to bring over all the files and data into the new platform. Migrating an unknown quantity of files and data from one system to another seems like a daunting task. How long will it take? How do you ensure the access permissions are maintained? How will the migration impact staff or day-to-day business?

Forthright's skilled team of migration experts can make the process stress-free, secure, and with minimal downtime. From scanning source data and mapping files, user folders, and permissions to communicating with the users on the transition and actions they need to take, Forthright will guide you through the process to efficiently and securely migrate your data to SharePoint and OneDrive.

We make sure you know the process ahead of time and then walk you through each step of your migration to ensure all the data is transferred and organized properly. We provide documentation to users of how to access their data and accounts after the migration to guarantee a smooth user adoption.

Move, migrate, or restructure data from file servers or cloud content from tenant-to-tenant, such as Microsoft Teams and Microsoft 365.

Migrate unlimited amounts of data easily and with full fidelity.

Analyze

Know what's relevant and important, or just collecting dust before your move. Understand your total size, channels, information architecture, checked-out files, and workflows that may impact your project to improve planning.

Migrate

When moving mapped drives from file servers or your entire data set from your M365 tenant, we include the seamless replication of file shares, OneDrive, Exchange Online, Groups, Teams instances, SharePoint sites, or individual lists and libraries to your target tenant along with all your existing permissions.

Ask how Forthright can migrate your U: and P: drives quickly and securely to SharePoint!

Data Governance

What KPIs do you track on SharePoint, Teams, and OneDrive to ensure your governance policies and regulatory requirements are being enforced?

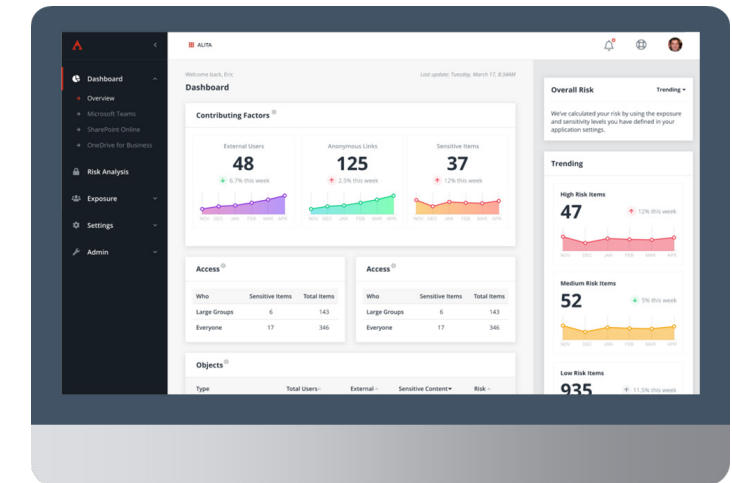

Data governance is essential for ensuring the security and compliance of your data. With the right data governance strategy in place, you can protect your business from risk.

Without proper data governance, businesses risk losing control of their data, which can lead to costly mistakes, security breaches, legal issues, and significant fines. Data governance services help businesses avoid these risks by providing a framework for managing data throughout its lifecycle – from creation all the way to the end of its retention period.

We understand that data governance and security can be a daunting task. That's why we're here to help. Let us help you protect your data and ensure that your organization is compliant with the latest regulations.

Schedule a complimentary risk review with Forthright and get the peace of mind that comes with knowing your data is secure.

Lack of data governance can result in:

- Increased regulatory risks
- Potential security breaches
- Decreased productivity
- Loss of business

Sample Risk Assessment Report

Although **98%** of companies consider data governance critically important, **46%** have no formal governance strategy

Business Process Automation

Increase efficiency, consistency & accuracy!

Forthright's Business Process Automation QuickStarts are a customizable solution that can help you streamline and standardize your processes to eliminate the paperwork shuffle and gain consistency across and within teams.

Start with our standard workflows for HR and vendor onboarding or create customized workflows for almost any department.

Forthright's QuickStarts are designed to automate mundane tasks and document-heavy onboarding processes, ensuring consistency across documents and boosting team productivity.

Most Centers have or need to use forms for many operational processes. It is likely that you have several forms today in each of these categories that need to be maintained:

- Administration
- Pharmacy
- Laboratory
- School Based Care
- Education
- Finance
- Risk Management
- Patient Care Services
- Health Information Management
- Environment of Care
- Personnel Credentialing
- Employee Health
- Quality of Service
- Various Medical Practices

Fast Track Your Digital Transformation with Process Automation QuickStarts

Invest in process automation to gain a wide range of benefits:

- ✓ Increased efficiency
- ✓ Improved accuracy
- ✓ Improved client satisfaction
- ✓ Improved employee satisfaction
- ✓ Cost savings
- ✓ Scalability
- ✓ Better visibility and control
- ✓ Enhanced compliance

Choose One of Our Pre-Built QuickStart Packages:

Human Resources

Automate repetitive manual tasks, such as data entry or payroll processing, to save HR professionals significant time.

Partner/Vendor Onboarding

Make the process uniform and straightforward to create a foundation for a strong, long-term relationship.

Customizable QuickStarts

Apply the benefits of automation to any department or process within your organization.

94% of workers say they perform repetitive, time-consuming tasks in their role

60% of occupations could save 30% of their time with automation

78% of business leaders believe that automation enhances the overall productivity of the organization

“Forthright guided us in the right direction and suggested the proper product for building our first-ever Intranet on the SharePoint platform. They listened and understood our needs well and helped us deliver a great product that was very welcomed by the organization. One of the most important features we provide our user base with is the Employee Directory so they can easily find anyone in the organization with the click of a mouse. It’s been a pleasure to work with Forthright on this project and am looking forward to many more in the future.”

Blerim Kaciu, IT Manager, Evara Health

WHY WORK WITH FORTHRIGHT?

Forthright’s mission is simple, yet significant: Exceed expectations. This is our goal in every interaction, every project, every relationship. We are committed to providing value to our clients by acting in their best interests.

Forthright has been helping clients optimize their desktop and application delivery for almost three decades. For us it’s about more than just tools and technology, we built our practice by being user-centric in everything we do.

It all comes down to experience...

- Our clients’ exceptional **experience** working with us.
- Our team’s extensive **experience** with technology.
- The end user’s seamless day-to-day **experience**.

Forthright Technology Partners is proud to serve HCN for over a decade. We offer thought leadership with an understanding of your unique needs. Transform your business with collaborative healthcare solutions that can help you deliver personalized, efficient, and informed care.
